WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

Internation application No.

PCT/US04/20902

Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability 1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of: the entire international application claims Nos. 2-48 because: the said international application, or the said claim Nos. ____ relate to the following subject matter which does not require an international preliminary examination (specify): the description, claims or drawings (indicate particular elements below) or said claims Nos. 2-48 are so unclear that no meaningful opinion could be formed (specify): The numerous variables, e.g. (formula I, II, III, IV, V, structures 1-24, R1, R2, R3, R4, Y, X, R5, etc.) and their voluminous, complex meanings and their virtual incomprehensible permutations and combinations make it impossible to determine the full scope and complete meaning of the claimed subject matter. As presented the claimed subject matter cannot be regarded as being a clear and concise description for which protection is sought and as such the listed claims do not comply with the requirements of PCT Article 6. Thus it is impossible to carry out a meaningful written opinion on same. A written opinion will be carried out on the first discernable invention of claim 1which is the compound of example 3, page 35, 2-fluoronicotinamide. the claims, or said claims Nos. ____ are so inadequately supported by the description that no meaningful opinion could be formed. no international search report has been established for said claims Nos. the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that: the written form has not been furnished does not comply with the standard the computer readable form has not been furnished does not comply with the standard the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in Annex C-bis of the Administrative Instructions.
